Summary

Cross-functional full-stack developer with a strong focus on delivering functionality to the end customer and meeting both culture and process standards within companies.

Experience

Vizeer – AI sales automation, Frontend/Design

oct. 2023 – feb. 2024

- Designed the entire application using Figma in the span of just 1 month. This includes both the landing page, dashboard, onboarding, and login/register.
- Interfaced closely with the dev team to meet project deadlines and helped the main Frontend developer code the UI.

Klardeal – smartare affärsavtal, Full-stack

oct. 2023 – dec. 2023

- Successfully deployed a platform that facilitates deals from large companies to small/mid-sized companies. Two (out of 5) deals were with multimillion-dollar companies.
- The platform garnered 25 customers that paid the membership fee to access these deals.
- The platform was fully designed and developed by me, with continuous iteration on new functionality to make the platform better. Technologies: Qwik.js, TypeScript, Cloudflare pages.

Project course in software development, Westermo, Full-stack

nov. 2021 – jan. 2022

- Worked together with the team to build a web app for managing risk in their different software projects. Technologies: Vue.js, TypeScript, Express, Docker, MySQL, Sequelize ORM.
- Responsible for communication between our team and the client, organizing a total of 5 meetings with the client.
